

## Systems Programming AE1 – Report

Niall Boyd – 2392483B

Both `date.c` and `tldlist.c` compile without errors, having tested compilation on `stlinux02`. As far as I am aware there are no bugs as there are no errors when compiling, and it produces output for both `small.txt` and `large.txt`.

While running `small.txt` file, there was a definite memory loss of 504 bytes in 14 blocks.

When running `large.txt`, there was a definite memory loss of 296,104 bytes in 7404 blocks.
